EU project offers funding for cities interested in developing electromobility

By Yannick Bousse (</users/yannick-bousse>) / Updated: 22 Jul 2015

An EU mobility project is offering European cities and transport providers funding and expertise to help them apply sustainable mobility measures related to electrified transport.

The ELIPTIC project (<http://www.eliptic-project.eu/>), part of the EU's € 80bn research and innovation programme Horizon 2020

(<http://www.eltis.org/resources/eu-funding/horizon-2020-programme>), aims to save cities money and energy by developing new solutions to optimise and/or regenerate their electric public transport systems.

The project is calling on interested cities to apply for a 'twinning' fund which will enable cities to make use of the electromobility expertise of ELIPTIC's partner cities and take part in workshops and study tours.

The twinning fund is a financing mechanism within the ELIPTIC project (<http://www.eliptic-project.eu/>) which aims to support the transfer of measures from ELIPTIC partner cities to 'twin' cities. Co-funding of up to 100 per cent is available to successful applicants and a maximum amount of €15 000 per applicant.

The application deadline for cities interested in becoming an ELIPTIC twin city is **31 August 2015**. Applications may be submitted by individual or local groups of organisations.

To apply, download the application form (<http://bit.ly/1JmLTse>). For more information, see the detailed call text (<http://bit.ly/1CLabPx>), or contact:

- Wolfgang Backhaus (w.backhaus@rupprecht-consult.eu (<mailto:w.backhaus@rupprecht-consult.eu>)) or Ana-Maria Baston, (a.baston@rupprecht-consult.eu (<mailto:a.baston@rupprecht-consult.eu>)) - Rupprecht Consult
- Yannick Bousse, (Yannick.bousse@uitp.org (<mailto:Yannick.bousse@uitp.org>)) - UITP
- Hendrik Koch, (eliptic@umwelt.bremen.de)- (<mailto:eliptic@umwelt.bremen.de>)- ELIPTIC co-ordination
